CashDro3
Automated cash management

Simple payment management

The CashDro is a banknote and coin processing terminal that ensures secure and closed cash processing between front and back office. With its fast processing of payments and change dispensing, it meets the performance requirements of a modern and intelligent payment system.

Benefits

- Easy payment management
- Real-time cash management (remote)
- Automatic counterfeit detection
- Improved customer satisfaction and productivity
- Real time cash closure
- Guarantees food hygiene
- Easy connection to your POS software (Android, iOS, Windows, Linux)

Equipment

- Acceptance and processing of 2 cent to 2 euro coins
- Insertion container for larger quantities of coins
- Capacity of the coin recycler: 1,500 coins
- Checking speed: 4 coins / second
- Output speed: 12 coins / second
- Acceptance and processing of 5 euro to 500 euro banknotes
- Input tray for depositing and checking banknotes
- Input speed of input tray: 3 seconds / single banknote
- Sequential banknote output
- 2 recycler modules for 100 banknotes each
- Capacity of the recycler for a total of 200 banknotes
- Collecting cassette capacity 1,000 banknotes
- Rejection of counterfeit banknotes and coins
- Anchoring system
- CPU supported, connection via Ethernet or WLAN

› Easy integration into any counter

› Real-time cash monitoring

› Works with one or more cashier stations

› Cash holdings are retrievable via an app
