Mounting tree

With cash cassette, EFT and printer

Mounting tree

With EFT, printer, scanner

Mounting tree

With UCDM, double VESA, scale

ANKER Poles Configurator

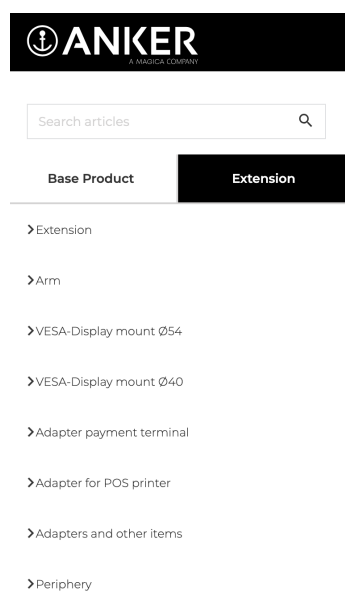

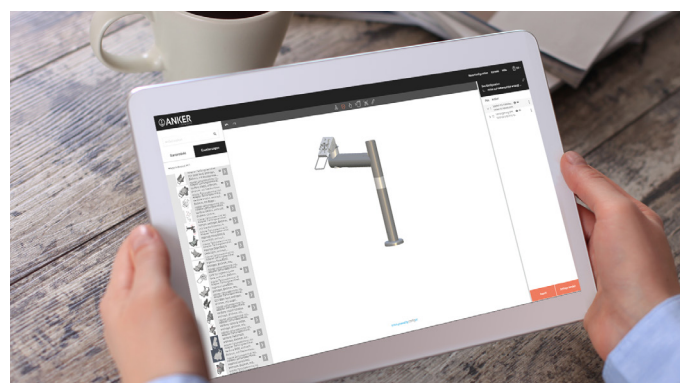

Customising the POS has never been easier

A printer on the right, the card reader on the left, a customer display in the middle? Or perhaps just a single arm? Swivelling? There are virtually no limits to the creativity of the configurator's users. Users can choose between a custom configuration or pre-configured industry solutions.

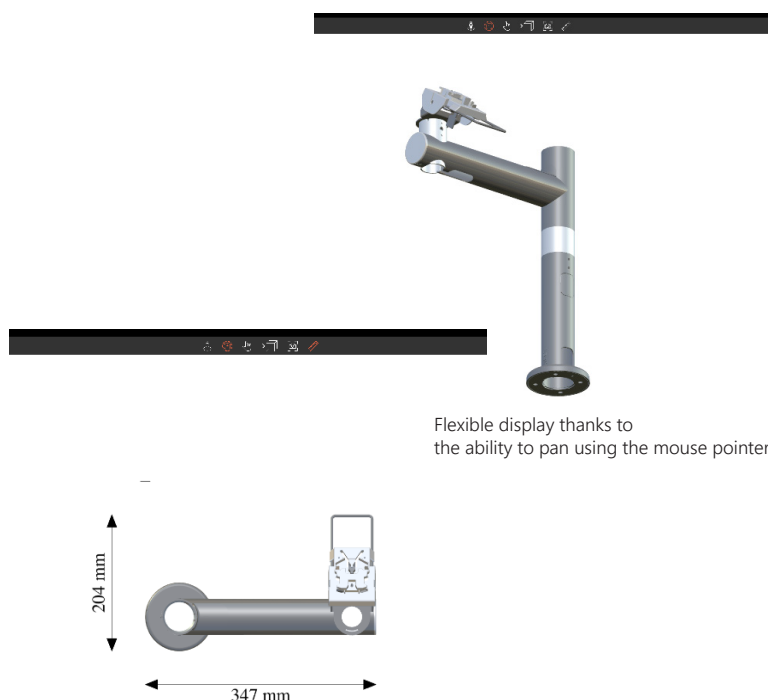

Whether modifying industry-standard models or creating a 'greenfield' configuration, users can independently design a solution that perfectly meets their individual needs. Thanks to the modular product structure, the number and orientation of the arms, as well as the type of devices to be fitted, can be freely selected.

HOW DO I GET MY OWN PERSONALISED ANKER POLE?

1. Visit our configurator at:
<https://konfigurator.anker.net/#/configurator>
2. Choose between a custom configuration or ready-made industry solutions. Create your own personalised ANKER Pole.
3. Submit a personalised price enquiry for your configuration. We'll get back to you straight away!

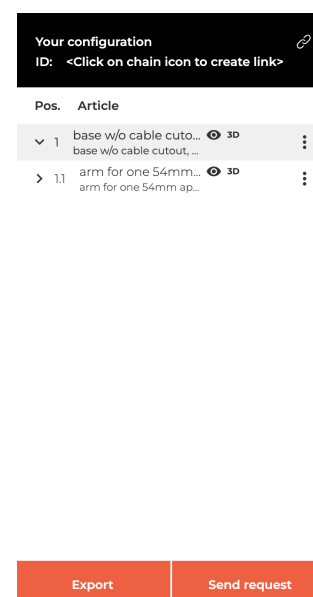

Clearly organised thanks to various categories

Flexible display thanks to the ability to pan using the mouse pointer

Dimensions can be displayed

The configuration can be exported or ordered directly on request
