ANKER 

The perfect
anchor for
your POS

Security with the ANKER poles

„I am proud when I see ANKER products at the cash desk while shopping – products that I played a key role in developing. That motivates me to do my very best every single day.“

Rainer Beek

1 Innovation

The spirit of innovation is part of our tradition and history. We are always on the look out to identify new market requirements and opportunities at early stages and respond with innovative solutions to meet evolving customer needs.

Furthermore, we have always been focused on the future. New market requirements are identified and successfully mastered. ANKER has always been an innovative company with a great desire for progress. Many inventions in the POS industry, which are now a matter of course, were first thought of or launched on the market by ANKER.

OUR TRADITION INSPIRES US TO LIVE AND BREATHE INNOVATION AND TOP QUALITY.

„As the head of assembly I am not only aiming for efficiency but for a motivated team and the highest product quality possible.“

Andreas Eickhölter

2 Quality

ANKER products last longer! ANKER consistently ensures product quality through processes, tests, investments, and the quality promise of every single employee.

SERIAL NUMBERS

Computer-based tracking of products and deliveries via serial numbers.

EXTERNAL TESTS

By engaging external examination bodies, our product quality is always examined and evaluated by independent sources. Recently, a DEKRA test confirmed 4.2 million opening cycles for the Standard Cash Cassette SCC plus.

INTERNAL TESTS

100% test procedures – every cash cassette or drawer is tested electronically for functionality.

COMMITMENT

Assembly employees “sign” completed cash cassettes and personally vouch for the quality of their work.

„Especially for us as a premium supplier of POS hardware it is crucial to guarantee the highest level of product security. That’s why we rely on professional manufacturing as well as a smart product design that optimally prevents theft. Because when it comes to our customer’s money, we do not compromise.“

Dr. Fabian Schühle

3 Security

Security has top priority at the point of sale. With ANKER products, you will always be on the safe side. They guarantee the highest protection during the entire process chain at the POS. Thanks to intelligent product designs, your money is reliably protected from unauthorised access at all times.

Count on robust and intelligent products for secure transactions. From special security locks, to security seals, right up to reliable workmanship of high-quality materials, ANKER products guarantee safety for your money.

FOR 360° DEGRESS SECURITY WITH 100% RELIABILITY AND FLEXIBILITY.

„I find it really exciting to see how the industry has developed over the years. Identifying our customers’ needs and offering every customer a solution that is perfect for them as part of this development, rekindles our enthusiasm every single day.“

Maik-Oliver Winzker

4 Flexibility

The majority of all customer requirements are covered by our high quality and cost-effective standard products.

With our expertise, we can also create solutions for very specific demands that our standard range cannot fulfil. Due to our long experience in the market, our industry know-how and the close collaboration with our numerous customers, requirements at the point of sale are identified and met successfully. Each individual product development is an exciting challenge, which needs to be mastered. With ANKER, you will always receive a reliable product, tailored to your needs, whether it is a standard product, a flexibly configured standard solution, or a customised solution.

Standard products

“Off-the-shelf” for conventional implementation scenarios in high quantities

Standard solutions

Flexible configurable, modular solutions

Customised solutions

Custom-made solutions

Delivery time

ANKER Standard products

The perfect anchor for your POS

Products of the standard product category offer you a major advantage: They are available **ready-assembled from stock**. This guarantees quick reaction times and short delivery periods. This makes you extremely flexible in planning and able to take action in unpredictable requirement situations.

Firmly secured for secure payment

Our ANKER poles for pay terminals belong to the group of standard products. The **lockable slider** offers you, and particularly your customers, an effective security mechanism for preventing hardware manipulation. Skimming is a term that repeatedly comes up with the use of EC cards or credit cards at the POS. ANKER's pay terminal adapters impede the manipulation or even the replacement of pay terminals, in order to spy out and even copy the customers data.

Effectively prevent manipulation

ANKER poles for pay terminals secure your card reading device ideally with mounting brackets or lockable sliders. This way, opening the terminal or attaching a skimming device is prevented extremely effectively. The complete, unauthorised replacement of the terminal is also only realisable with considerable time and work effort. Any manipulation would also be noticed immediately.

Adaptive security concept

ANKER offers you an adaptive **security concept for safeguarding the terminal**. With this, you decide the extent to which you protect your customers sensitive data. The terminals are placed in the EFT poles, reliably secured with an additional seal or with a security key lock. They offer the right solution for any requirement

Long service life due to sturdy design

ANKER poles are made of sturdy, high-quality, round steel that is 2 mm thick. The hinge, with which the card terminal can be continuously tilted by your customer is **also of a high quality** and ensures constant, consistent functionality. The diameter of the pipe system is selected such that all cables can be conveniently installed within the tube. It offers **additional protection against manipulation, depreciation or damage**. A further advantage of the pipe system is the easy cleaning and the hygienic mounting.

> Durable to high-quality materials

Hygienic and elegant solution due to inner cable routing

Available for all relevant pay terminals

Applicable in the health sector

Counter clamp for mounting on the counter

Stand-alone or in the system

ANKER poles for pay terminals can be permanently mounted on the cash desk as a stand-alone solution. In this standard version, the ANKER pole is delivered with robust powder coating in RAL 7021. The secure mounts are available for all common EFT terminals. The terminal-specific mount can also be used as a component of a complete solution.

Also available as ANKER terminal mounting for multifunctional use in the health sector.

The security levels of the ANKER EFT poles

Do you need your card reader to cash-up at the table, but do not want it just lying around? In that case, our mountings are your ideal solution! All ANKER mountings hide every necessary cable perfectly inside and your card reader lies stable in the mounting. You only have to decide on one security level.

Pole with slider and lock

Maximum security of the EFT device at the point of sale by a plug lock. The holder cannot be opened without the key

Pole with safety bracket

Thanks to the firmly screwed bracket, the EFT device sits theft-proof in the holder without any chance of unauthorized access.

Pole with screwed on EFT terminal

The mounting with screwed-on EFT device offers a stable and theft-proof solution.

Pole with form fixed EFT terminal

Maximum flexibility! Your card reader fits firmly in the holder and can be removed quickly and easily.

ANKER poles configurator

Are you looking for a **flexible mounting system** for your POS components? ANKER lets you configure the ideal mounting system for your checkout desks with just a few clicks with the world's first pole configurator. A printer on the right, a payment terminal on the left, a monitor in the middle? Or would you prefer just one arm? Rotatable? There are no limits to your creativity. Modify tried-and-tested industry classics to your heart's content or start your configuration from scratch to find the perfect solution for your individual requirements

How do I get my individual pole?

1. Visit our configurator: <http://konfigurator.aks-anker.de/en>
2. Choose between an expert configuration or a guided configuration
3. Create your individual pole
4. Order your configuration and benefit from enhanced efficiency and ergonomics at the POS.

Thanks to the modular product system, the height, number, and orientation of the arms, as well as the type of devices to be attached, can be selected freely. The poles, made of high-quality steel, unite flexibility, stability, and extreme longevity.

- ✓ Improved efficiency at the POS due to a sensible ergonomic arrangement
- ✓ Customize your pole with your corporate logo
- ✓ Your pole is delivered in a fully assembled state
- ✓ Find your perfect pole in just a few clicks
- ✓ Adaptable to all applications, stable, tailor-made

Individualising the POS has never been easier

Two years after its spin-off from the Oracle Group, Anker Kassensysteme GmbH surprises its customers with a real innovation. At <http://konfigurator.aks-anker.de/>, interested customers can use the world's first pole configurator to put together the ideal mounting system for their checkout workstation with just a few clicks. A printer on the right, the card reader on the left, a customer display in the middle? Or just one arm? Pivot? There are virtually no limits to the creativity of the configurator users. You can choose between a guided configuration and an expert configuration.

When modifying industry classics or a configuration, starting 'on the green field', users can independently create a perfect solution for their individual needs. Thanks to the modular product structure, the number and orientation of the arms as well as the type of equipment to be attached can be freely selected. "The configurator is a great way for our customers to finally get the cash desk workstation they need. A workplace-specific arrangement of work equipment at the point of sale can immensely increase efficiency", emphasises ANKER Managing Director Dr. Fabian Schühle. "We notice again and again that some customers are not even aware of what is possible in this area. Our stand configurator allows us to show our customers their options in the most modern way".

The poles made of high-quality steel combine flexibility, stability and extreme durability. ANKER relies on standardised processes in order to be able to offer the customer-specific poles. Even delivery times of less than two weeks or the printing of individual customer logos on the poles are no longer a problem. With the Poles configurator, the majority of all application scenarios can be mapped at the POS. ANKER continues to fulfil very unusual customer wishes within the framework of individual development projects.

Convince yourself of the high-quality Poles solutions from ANKER and be inspired by the world's first Poles configurator: konfigurator.aks-anker.de

Team ANKER wishes you a lot of fun configuring!

ANKER standard solutions

100 % flexibility for your POS due to the ANKER modular concept

We aim to provide you with a customised solution for your POS within a few days. In order to archive that objective, we developed the ANKER modular concept.

Flexible design of your checkout

ANKER poles are a **modular system**, from which you can put together your own customised solution by selecting different components. Our modular technology platform is comprised of numerous **individual components**, e.g. pedestals, arms and sockets in different lengths, printer adapters, pay terminals, adapters or wall mounts. You will have a tailor-made solution straightforwardly configured within a few minutes by using the ANKER modular concept. Components can be **replaced or extended easily and simply even afterwards**.

ANKER pole with tablet, pay terminal, printer and cash cassette; tablet mounting available for all common tablet brands and sizes

ANKER Pole with display and pay terminal

Scanner holder can be mounted at the socket and the arm, for example for self checkout

No compromises at the checkout

With all of the components of the modular system, **the cables are installed within the system**. Therefore you have a hygienic and easy to clean solution. Individual modules of your solution are inserted into one another. With this type of design, you will have a checkout with a calm and very tidy layout, so that the pay terminals adapt perfectly to the environment. Another benefit is the **high stability of the ANKER poles**. No wobbling, no crooked installation, even after many years. A high level of cleanliness is also achieved quickly due to surfaces that are very easy to clean.

Arbitrarily and intelligently adaptable

The intelligent ANKER modular system offers absolute **flexibility with the installation of your POS hardware**. Now and in the future. The system can be adapted quickly to new requirements afterwards, at any time. Do you no longer need a VESA mount and would like to change over to a tablet? With the ANKER poles, that is no problem. You only need to replace your VESA mount with a tablet mount. All other components remain unchanged. This way, all options are open to you.

Short delivery times

Quick availability is important. Short delivery times simplify the planning and give you the necessary security for unforeseeable requirements. From the large portfolio of the modular technology platform, ANKER has defined the most selected components as a special standard. This gives you the opportunity to always purchase your customised solution in a specific quantity from stock. This way, you will have your own personal solution and you will profit from the quick availability of individual components

ANKER Mobile Media Pillar

Customer information made flexible

The rapid development of mobile devices is not just an issue that affects us privately for a long time now. Mobile devices have also established themselves in the retail sector.

Mobile and fit for retailers

The ANKER Mobile Media Pillar offers you the ideal platform for a mobile and simultaneously secure use of your mobile devices. Position your tablet or any desired device, conveniently and securely on the media pillar with a VESA mount. Whether it is used as a kiosk system, customer information centre or sales assistant: With the Mobile Media Pillar, you are keeping pace with the times. It can be set up quickly and easily wherever you would like to address your customers. The **sturdy base plate** made of metal and the **hidden security lock of the tablet mount** give you a maximum of security. ANKER Mobile Media Pillar – perfected for the retail sector.

› Use mobile devices virtually anywhere

› Flexible use, a variety of options

› Sturdy, visually appealing design

› Secure, due to lockable tablet mount

Safely stored, easy to take off

Communication at customer level

ANKER Mobile Table Topper

Mobility in the customer dialogue

The rapid development of mobile end devices is not just an issue that affects us privately for a long time now. Mobile devices have also established themselves in the retail sector.

One solution, many applications

With the ANKER Table Topper you benefit from **maximum flexibility** in the use of mobile end devices. Its robust and compact design stand offers **maximum security**. The Table Topper is a portable solution with a lockable mount for tablets on a very **sturdy stand base** and virtually **limitless applications**. Your tablet turns into the perfect assistant in consultations and ensures optimum customer interaction. It can also be taken along to the table as a mobile entertainment solution.

Secure but always flexible

The Table Topper offers the advantage that it cannot be carried out of the store. You have the mobility of a tablet and the same security as with a fixed installation.

> More secure, mobile use

> Flexible for various uses

> Sturdy and visually appealing design

> Secure due to lockable tablet bracket

Easy to install horizontally or vertically

Double sided mounting

UCDM

Modern, flexible, functional and safe

The robust universal drawer convinces thanks to its numerous installation options. Not only can it be conveniently positioned on the counter, it can also be installed under the counter by means of a mounting frame. The third option is unique on the market: for the UCDM to make a real statement at the cash desk, it can be partially recessed in the countertop.

The **cash insert** is **worldwide unique** and can be **easily removed and folded as a closed system** for safe transport to the back office. It can be secured with a **security lock**. Due to its compact size, the folded money tray can easily be stored in the safe.

The variable money insert can be individually adapted. It has 4 note compartments and 8 coin cups as standard. If required, 2 coin cups can be combined to form a 5th note compartment. By adding further separators, the remaining 6 coin cups can be increased to 8. Weighable coin cups optionally available.

ANKER offers a different version of the UCDM, where a Flexi Stand can be installed.

UCDM at a glance

- > Cash drawer insert is a closed system
- > 3 installation variants for maximum flexibility
- > 6/8 coin and 4/5 note compartments
- > Robust due to sturdy metal housing

Cable guidance and pilot holes for pole mounting

Cash drawer with pole socket

Cash drawer with tablet holder mounting

Cash drawer with display mounting

Cash insert is worldwide unique; can be folded

Installation

Three installation variants for maximum flexibility:

1. Simple installation on the counter.
2. Under the counter held by a mounting frame.
3. Partially recessed in the countertop.

Microswitch

A microswitch for status checks is integrated.

Electrical connection options

Compatible with all systems.

Connecting cable

Compatible to the pin of the cash register, various lengths available.

Lock on the cash drawer

2-position cylinder lock (emergency opening, electrical operation) including 2 keys with 200 different lock variants optional.

Lock on the cash drawer insert

Key lock optional for individual locking.

ANKER customized solutions

A solution for every requirement

Not every existing solution fits to every checkout desk. If the solution that you require cannot be put together with our modular system, we will be pleased to assist you quickly with the design of your customised solution. With the firm attitude of "nothing is impossible", we are available to you with advice and assistance in order to jointly develop the ideal solution to the requirements at your POS. Our experienced team will be pleased to visit you for individual consultation and support.

With all of the components of the modular system, the cables are installed within the system. Therefore you have a hygienic and easy to clean solution. Individual modules of your solution are inserted into one another. With this type of design, you will have a checkout with a calm and very tidy layout, so that the pay terminals adapt perfectly to the environment. Another benefit is the high stability of the ANKER poles.

Customised solution with a curved tube; the ideal solution, especially in confined spaces behind the counter.
