## TEKA desinfecto Spray BASKET

### Protection for customers and employees - clean baskets for hygienic shopping

The disinfectant spray system ensures that the shopping baskets in the store can be disinfected quickly and efficiently, thus preventing the spread of germs. The handling is self-explanatory and, above all, contactless: the basket is simply hooked in and the precisely aligned spray valves moisten the grip surface of the shopping basket with disinfectant. The system is activated automatically. In addition, the spray system can be used to disinfect the hands. The spray is activated contact-free by a sensor.

The TEKA desinfecto Spray BASKET convinces with its compact and space-saving design. Made of stainless steel and anodised aluminium, the spray system is mobile and can be used indoors. Thanks to the castors, it can be positioned quickly and easily wherever protection and hygiene are needed.

**Dimensions:** 450 x 460 x 2.080 mm (L x W x H)

**Material:** Stainless steel, anodised aluminium

**Wheeling:** TPE rolls Ø 125 x 35 mm

## TEKA desinfecto Spray ECO

### Easy handling for maximum protection

Shopping trolleys or even luggage trolleys are disinfected quickly and efficiently with the TEKA desinfecto Spray ECO. The trolley is pushed underneath the unit and the precisely positioned spray valves moisten the grip surface of the trolley with disinfectant. In addition, the spray system can be used to disinfect the hands. The drizzle is activated contact-free by a sensor.

The TEKA desinfecto Spray ECO convinces with its compact and space-saving design. Made of stainless steel and anodised aluminium, the spray system is mobile and can be used indoors. Thanks to the castors, it can be positioned quickly and easily wherever protection and hygiene are needed.

**Dimensions:** 400 x 1.106 x 1.625 mm (L x W x H)

**Material:** Stainless steel, anodised aluminium

**Wheeling:** TPE rolls Ø 125 x 35 mm
