

Cash Box Storage Cabinet

Safekeeping as per ANKER principle

Safety that goes beyond of the checkout counter

ANKER does not only serve the direct POS – we think forward. As soon as a shift is over or a break is due, a practical and efficient solution must be found. For this purpose, the ANKER Cash Box Storage Cabinets were designed. Although your cash is already safe in the ANKER cash boxes, we at ANKER are constantly improving security.

Supervision during the break

Your cash boxes can simply be stored in separate compartments in the ANKER Cash Box Storage Cabinet. They are closed by a safety mortise lock. Also the foldable inserts of the ANKER universal cash drawers UCD and the UCDM fit easily into the cassette cabinet. For a stress-free break.

Field of application

In the backoffice for safe storage of cash cassettes and foldable inserts.
