ANKER

ArcLine customer display

Convincing - not only visually

Next generation ANKER customer displays

The new generation of ANKER customer displays focuses on **high contrasts and increased sharpness** and thus **significantly better legibility**.

Thanks to the enhanced technology our classic ArcLine can now be connected not only with the RS232 plug but also **with USB** so there is no need for an additional power supply. They convince without any restrictions.

Whether large or small

To please every kind of POS, we offer the ArcLine in different heights. It is **easy to install** and can be **pivoted and swivelled vertically and horizontally**. This allows a positioning that it can be read clearly by your employees and your customers. With its specially developed socket and the use of a stainless steel pipe as a stand base, it is also able to withstand horizontal pressure of up to 30 kg. Even under the highest stress, the **robust and reliable technology** of ArcLine ensures many years of performance.

Diverse support of **different command modes** (Epson, CD520, LD9000, POS7300 etc.) enable the **adaptation to a multitude of POS systems** as well as the seamless integration into the **ANKER All-in-one POS solution till.one**.

Dimensions of module:

Width x height x depth: 152 x 65 x 23 mm

Colours

■ RAL 7021 black-grey/anthracite

> Optimum legibility at all times

> Longlasting components

> Individually adaptable to the checkout
