

## ANKER tab.one

### DER TABLET-SUPPORTER

#### **Safe mount thanks to the reliable construction**

A robust mount, which keeps a tight hold of your tablet: the ANKER tab.one. The tab.one makes it easy to integrate an iPad with 9,7" or 10,2" and the Samsung A7 and S7 in your day-to-day life. The holding frame is made out of high-quality metal and is suitable for advertisement and current offers, as a mount for your cash register system or as a classical tablet bracket for when you are cooking for instance. No matter where and when you decide to use it - your tablet will always be well attached.

#### **Timeless design with a pinch of ANKER**

The tab.one is available in three different colours: matte-anthracite, matte white and glossy white. The angle provides the **optimal legibility** and turns the tab.one into the ideal companion for flexible use. On the back there are two bars, which fix the tablet. The nut screws lock the tablet stable. It is also where you can find an elegant, small detail, which hints to the origin of this construction: An incorporated silhouette of an anchor.

#### **Unlimited applicable**

For maximum functionality, the frame is constructed in a way that doesn't intervene with the usage of the home button as well as the camera. Thanks to its heavy base plate the tab.one stays steady. To improve security the tab.one can be screwed on; therefore there are two holes in the base plate. This way the tab.one fits into every situation and finds practical usage

#### **Dimensions**

Tablet frame: 273,1 x 190 mm (B x H)

Base plate: 273,1 x 161,9 mm (B x H)
